Experience

AniLu Studios

Game Development Intern (April 2026 – June 2026)

- Developed core gameplay features for PBA Court Kings, using C++ and Unreal Engine, resulting in a functional and engaging user experience.
- Conducted Quality Assurance and game testing procedures, using structured debugging methods, resulting in the successful identification and resolution of software issues.
- Integrated backend systems including CRUD operations and Azure APIs, using Plastic SCM for version control, resulting in streamlined project management and stable data flow.
- Supported on-ground promotional campaigns, using cross-team collaboration, resulting in enhanced marketing efforts and increased public visibility for the game.

Arch Global Services (Philippines) Inc.

Talent Acquisition Admin Support (January 2023 – April 2023)

- Coordinated screening schedules and contacted candidates, using streamlined corporate recruitment workflows, resulting in an efficient and organized talent acquisition process.
- Updated candidate records and assisted with departmental projects, using meticulous data management practices, resulting in accurate and highly visible applicant tracking for the broader team.

Education

University of Santo Tomas

BS Computer Science in Game Development (2022 – 2026)

Relevant Coursework: Human Computer Interaction, Game Engine Development, Software Engineering, Object-Oriented Programming, Data Structures and Algorithms, Information Management, and Computer Graphics & Visual Computing.

Technical Skills

Languages: JavaScript, HTML, CSS, Java, Python, C#, SQL, Dart

Frameworks & Engines: Flutter, Unity, NetBeans

Tools & Software: Git, VS Code, Blender, Figma

Design & Architecture: UI/UX Design, Database Management

Projects

SpeakUP – Job Interview Training Game (September 2024 – November 2025)

- Developed an interactive job interview simulation, Unity, C#, Deep Q-Networks (DQN) and Proximal Policy Optimization (PPO), resulting in a dynamic, real-time training environment for graduating students.
- Implemented the game's user interaction layer and front-end UI, using Unity Canvas and event-driven

programming, resulting in an intuitive interface that seamlessly displays adaptive, real-time player feedback.

MV88 Ventures: Inventory Management System (September 2024 – June 2025)

- Developed an end-to-end web-based inventory management system, using Java, SQL, and JavaScript, resulting in streamlined real-time stock tracking and optimized daily operations for a pet business.
 - Built a responsive and intuitive front-end interface, using HTML, CSS, and JavaScript, resulting in a highly optimized administrative workflow and reduced manual data entry time for the client.
 - Engineered the back-end infrastructure and database architecture, using secure data storage practices and optimized queries, resulting in rapid data retrieval and seamless integration with the user-facing dashboard.
-
